Workflow Exploration Report

Homepage Informational Content and Navigation Verification

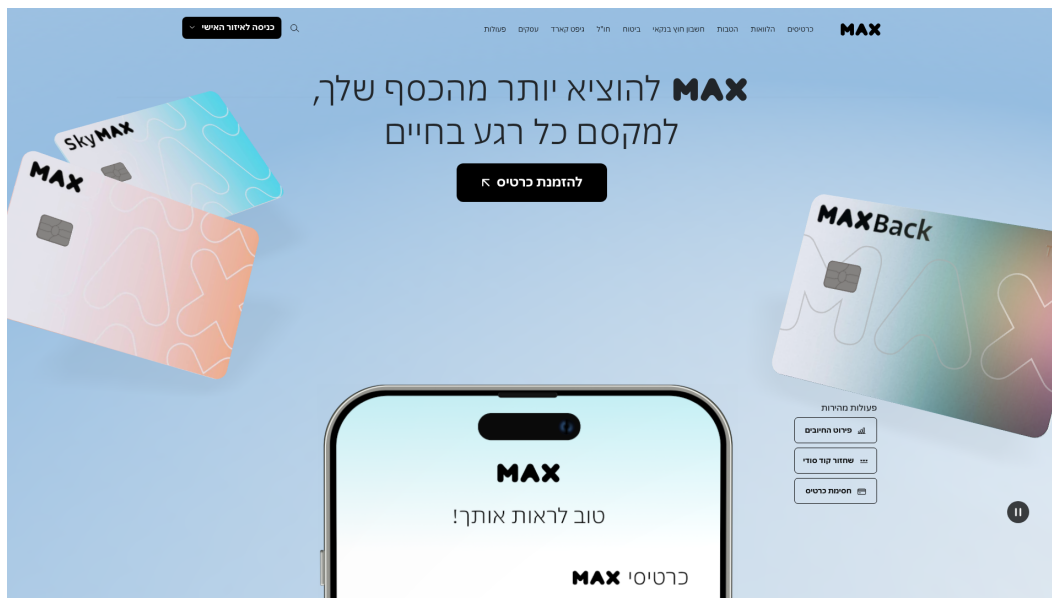

Website: <https://www.max.co.il>

Feature Area: Homepage Informational Area

Goal: Ensure the homepage loads correctly, all main banners and informational sections are displayed, and navigation links are present and visible.

Generated: April 25, 2026 at 07:14 AM

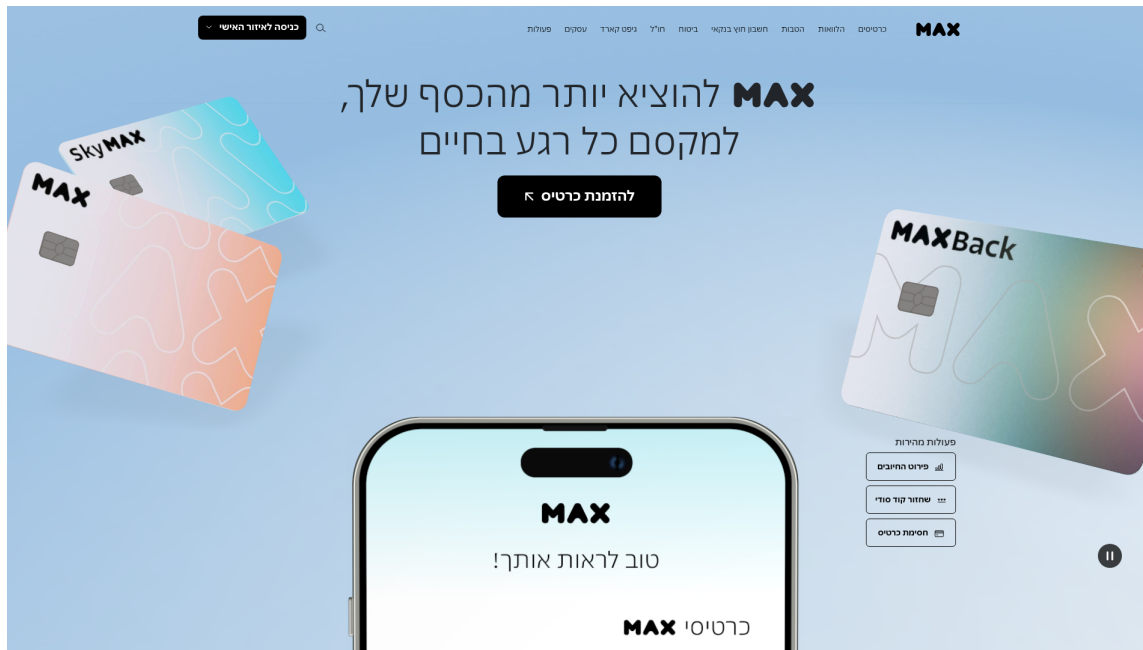

The AI successfully navigated to the Max homepage and verified that the main banners, informational sections, and navigation links are present and visible. The workflow demonstrates that key homepage content and navigation elements are accessible to users.

Step-by-Step Walkthrough

1. Homepage Main Banner Displayed

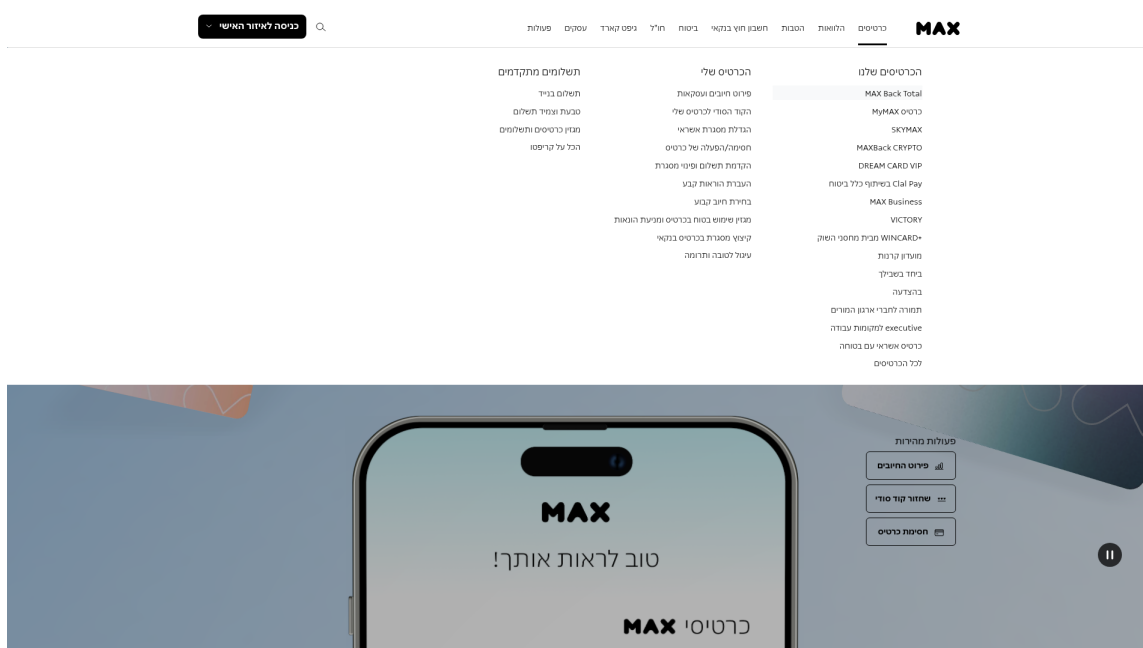

The AI navigates to the Max homepage and confirms that the main banners and informational sections are prominently displayed, ensuring the page loads correctly.

<https://www.max.co.il>

2. Navigation Menu Expanded

The AI interacts with the homepage navigation, verifying that all main navigation links and dropdown menu options are present and accessible.
